

# SERVICE TRAILERS

# Reliable Gear, Reliable People

GO Industrial is a forward-thinking designer, manufacturer, and supplier of Fluid Handling and Industrial Equipment. As Equipment Specialists, we believe in making equipment more accessible for everyone. We work to develop strong relationships with our customers and take pride in building a community around the products we supply.

GO embraces technology to bring you professional, fast, and cost effective ways to source what you need for your site, renovation, workshop, warehouse, farm, or production line. We fuse the good old way of doing business with modern technology. What is non-core and noise to your business is what we get out of bed to deliver.

# SERVICE TRAILER

## Cool Builds

GO Industrial designs and manufactures innovative and functional service trailers in our Australia workshop, collaborating with clients to meet the challenges faced in our unique environment. Our skilled mechanical and electrical team build to your needs, with a focus on fluid handling systems.

Here's what makes us different:

**Built to Your Needs:** We build something that works, function over form. We understand when you're out on the job, time is of the essence, and our trailer is designed for peak efficiency.

**Best of Brands:** We use top-tier components from Graco and Piusi for performance and reliability. We have equipment suitable for each and every application, and multiple price-points.

**Built Tough, for Tougher Conditions:** Our robust, mine-spec builds handle the harshest environments.

GO Industrial delivers reliable, efficient service trailers through unique design, quality components, and rugged construction.
