

OILSAFE® TRANSFER SOLUTIONS

OILSAFE is the oil transfer solution preferred by leading companies around the world.

People often go to great lengths to preserve the quality of their oil, only to contaminate it by using filthy containers, pouring it through a dirty funnel or inadvertently mixing it with different oil.

The color-coded range of OILSAFE containers provide:

- A fully sealing unit that prevents contaminants from getting into the oil
- Easier dispensing without the need for secondary tools such as funnels

Open top, unsealed, homemade containers deliver contaminated lubricants into the heart of your machinery.

OILSAFE down-stroke pump delivers 1 liter with approximately 12 strokes

Quick twist spout is easy to open and close. Controls flow and keeps dirt out

See-through drums with graduated markings make it easy to see and measure liquid levels

Bright colors make OILSAFE dispensers easy to find and easy to color-code lubricant grades
